elieving in the scriptural injuncthat bousting should be done im who is discarding his arthey than by him who is puton, we make no extrayagant in this the in tial number PAILY HERALD. Suffice it e shall carnestly endeavor he paper worthy of the of Brownswil g. and to reast of her progress, feeld that if we but prove s worthy we shall receive a support and patronage from people of the town. From ny warm greetings eady received, we believe that the citizens here feel that a good paper deserves patronage and that its prosperity, their individual welfare and the general good of the town are all interwoven. Ale paper well conducted -- and what is of equal importance, well patronized. is a great advertisement for any locality. Politically the paper will be democratic to the core, but at the same time tolerant of the convicflong and opinions of political opponants, treating all with courtesy and respect. Having for our natal day one so auspicious—the birthday of the nation—we hope it may prove an omen of success, and that as our lovely little city grows and prospers. the paper may expand and HERALD our prosperity to the warld.

THE Galveston News correspondent speaking of the Texas delegation to the National democratic convention, says: "They commanded the highest respect from every man in the convention, and when they shook the dust or mud of this place (Chicago) from their feet they commanded the greatest respect of the democracy of a'l other parts of the Union." A glance at the personel of the delegation fully instifies the commendation. Texas demogracy can hold its own with the best when represented by such men as Ex-Govs. Throckmorton and Ireland, Seth Shapard Dallas, J. H. McLeary of San Antonio and O. T. Holt of Houston. THE EX-PRESIDENT.

That Grover Cleveland as president is the heart's desire of the masses of democrats can no longer be denied. His nomination over the opposition of Tammany was a victory which will make frjend for the democratic party. Tam many's opposition is well understood as directed against the man too pure and incorruptible to be debauched by its practices, too honest and firm in his convictious to be led at will by machine politi cians. Grover Cleveland is beloved b; the people and they will raily to his support, yes, even those who may differ from him on some political points, he anse they know him to be a man of unquestionable integrity, who will perform what he promises and whose conscience will permit him to promise nath, ing that he cannot conscientiously fulfil. He has the confidence of fri-nd and foe slike. In him we and shall have a pilot with a clear head If encouragement we have have a steady hand to guide us. By all means let us have

It is reported that Dr. J. W. C. Love of Mexico, contemplates bringing suit in the name of the Love family to recover 6,000,000 acres of land in North Texas. The property includes the cities of Fort Worth and Dallas, and is valued at one billion of dollars. A veritable

No act of greater injustice could be perpetrated by the managers of the world's fair than the proposed exhibition of pictures of 200,000 criminals to be furnished by the National Prison association. Many people themselves apright have friends or relatives either living or dead whose pictured fages would greet them most unpleasently in this ussemblage. The pictures were taken for the purpose of detecting crime or criminals, not to be displayed to the world. Are we proud of our criminals, that we wish to parade their likenesses before our foreign consins? Is it right to wound the feelings of fathers, mothers, brothers or sisters by confronting them with such reminders of their family shame? There are many who having been entangled in the vortex of crime have afterwards reformed and are now living the lives of hignest, useful citizens. Imagine the feelings of such an one greeted by his own face in such a place-his former vice published to the world-to the new friends and associates he has made. What encouragement has a man to retorm when the blighting effect of former crime is to be thrown over his ontire life? The world's fair is A Town always prospers best to be held for the purpose of exhibiwhen the people all are willing to ting our industrial progress, our nahelp each other. > THE dreadful drouth of the past few years has reduced the region embraced in several counties of Southwest Texas to almost Saharan barrenness. Stockmen have been forced to transport their cattle to pastures in the territory or elsewhere, thus taking awayifrom the starving people their only employment, and the people thenselves are forced to apply for aid to their more fortunate fellow-creatures. This in a region which was once a immense amount of land of plenty-with a soil as fertile as can be found anywhere. And the fertile soil still remainsis the one thing needful to produce plenty in the midst of this want and desolation. This need should be supp'ied. In these days of progress, why do we sit idle when by artificial means this desert could be reclaimed. Artesian Wells should be sunk, and irrigation resorted to. If the land barous who own thousands of acres of this now barren soil would only use some of their abundant means to water this desert they would perform a deed of mercy.

THE TICKET,

There seems to be general setis faction over the result of the Chieago convention-and by far the majority of prominent democrats think it the strongest ticket dem ograts could have chosen. The opposition to Cleveland in New York is certainly a very grave thing, vet we cannot believe that Tammany leaders would earry their opposition so far as to knife the regular nominee of the party, especially as Stevenson's nomination for the second place is an acknowledged copcession to Tammany. It is a fortonate thing, too, for the pa ty that they could make this concession, and yet choose a man with as clean a record and as great popu-Office over larity as Stevenson.
